Brass Tube Fittings are designed as leak free connections for process, power, and instrumentation applications. The single/double ferrule fittings are also available in a broad range of sizes, materials and configurations.

TC FITTINGS

Tri-clamp fittings are also known as tri-clover or sanitary fittings. These TC fittings in India are common type of fittings. Threads in pipe fittings are great place for organisms to hide & contaminate your fluid. Because these fittings have virtually no threads, it's easy with these fittings to keep sanitary. The TC fittings are very universal and available as per your require.
